

# UX Design Storyboard: KSS Big Picture

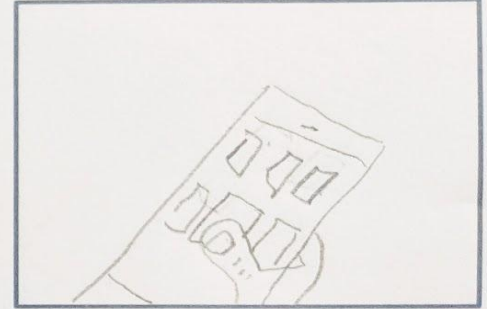

**Scenario:** App to help admin users to schedule product postings

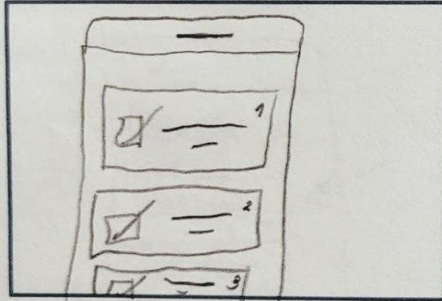

Krystal is holding one of the twins

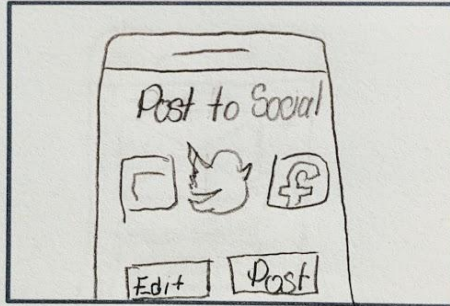

Krystal realizes she needs to schedule products to be posted to her store

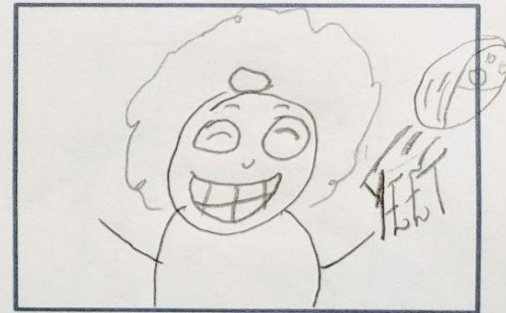

Krystal opens the app

Krystal schedules 5 products at a time to be posted

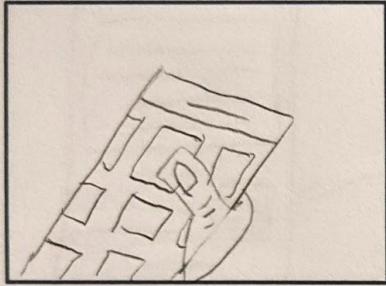

Krystal also schedules the same posts in the app on social media

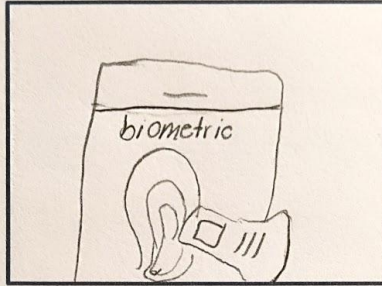

Krystal is excited and relieved that she can schedule everything at once

## UX Design Storyboard: KSS Close Up

Scenario: App to help admin users to schedule product postings

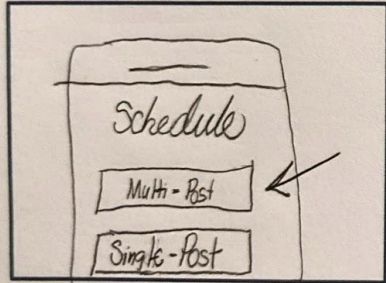

Krystal opens the app

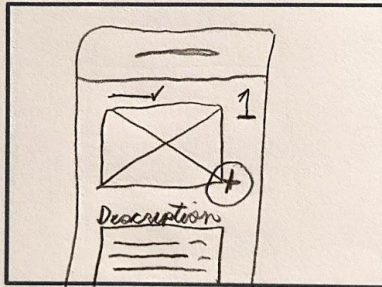

Krystal does a biometric fingerprint authentication to access the app

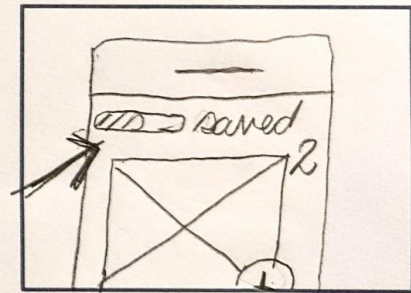

Krystal clicks on the schedule icon on the navbar

Krystal chooses the option for multi-post

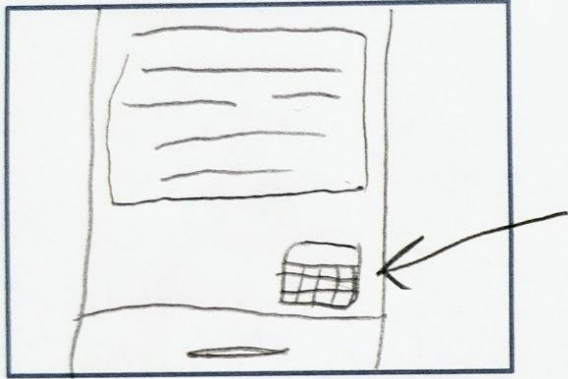

Krystal starts uploading product images, and descriptions

Each product autosaves as Krystal goes along

## UX Design Storyboard: KSS Close Up

**Scenario:** App to help admin users to schedule product postings

Krystal taps the calendar icon to schedule posts all at once
